

Instructions for your free Bee Square seeds.

1. Simply clear a square metre spare patch of your garden or put some garden soil in a pot or two. (Old compost is best)
2. Sprinkle the seeds evenly by mid-end May, and fork over lightly
3. Water them and keep them moist if there is no rain.
4. Then let us know. Register your participation so we can map our bee activity. Scan the QR code on the leaflet or visit
